

SONGLIN JIANG

✉ clorf6@gmail.com  [clorf6](#)

EDUCATION

University of Illinois Urbana-Champaign

Urbana, IL

Ph.D. in Computer Science, advised by [Prof. Ge Liu](#)

Aug. 2026 – Present

- ▷ Working with the group since Aug. 2026; formal enrollment begins Jan. 2027 (deferred start)

Shanghai Jiao Tong University

Shanghai, China

Bachelor of Computer Science

Aug. 2022 – June 2026

- ▷ Member of [ACM Honor Class](#), an elite CS program for top 2% students
- ▷ Cumulative GPA: **90.45/100**

RESEARCH INTERESTS

My research interests lie in generative models and optimization, with a focus on designing efficient, scalable, and lightweight models. I am broadly interested in using these methods to accelerate scientific discovery. Currently, my work focuses on protein modeling and AI-driven drug discovery (AIDD).

PUBLICATIONS

FlashBind: Towards Accurate and Efficient Structure-based Virtual Screening

Songlin Jiang, Yifan Chen, Aarti Krishnan, Yu Zhang, Wengong Jin

Transactions on Machine Learning Research (TMLR), 2026. [\[code\]](#) [\[pdf\]](#)

Repurposing AlphaFold3-like Protein Folding Models for Antibody Sequence and Structure Co-design

Nianzu Yang, Songlin Jiang*, Jian Ma*, Huaijin Wu, Shuangjia Zheng, Wengong Jin, Junchi Yan*

Annual Conference on Neural Information Processing Systems (NeurIPS), 2025. [\[code\]](#) [\[pdf\]](#)

RESEARCH EXPERIENCE

Northeastern University

Boston, MA

Visiting Student, advised by [Prof. Wengong Jin](#)

May. 2025 - Dec. 2025

- Efficient Computational Models for Large-Scale Molecular Binding-Affinity Prediction
 - ▷ Developed a lightweight model architecture achieving a **50x inference speedup** over state-of-the-art models like Boltz-2, while maintaining near state-of-the-art accuracy on molecular binding-affinity prediction. (*first author, accepted by MLSB 2025*)
 - ▷ Extended the core architecture into a unified, multi-task framework for a broad range of molecular interaction prediction tasks. (*first author, accepted by TMLR 2026*)
 - ▷ Role: project lead; responsible for data collection and curation, model implementation, conducting the majority of training and experiments, and co-authoring the paper.

Shanghai Jiao Tong University

Shanghai, China

Undergraduate Researcher in Rethink Lab, advised by [Prof. Junchi Yan](#)

Aug. 2024 - Apr. 2025

- Repurposing Large Pre-trained Structure Models for Antibody Sequence-Structure Co-design
 - ▷ Proposed a generative co-diffusion framework that repurposes large pre-trained structure-prediction models (AlphaFold3-style) for joint sequence-structure generation, overcoming data scarcity to achieve state-of-the-art performance with a 65% CDR-H3 recovery rate (**an 87% improvement over baselines**). (*co-first author, accepted by NeurIPS 2025*)
 - ▷ Role: project co-lead; responsible for the model design and implementation, training and part of the experiments, as well as preprocessing part of the data and revising the paper.

TEACHING EXPERIENCE

Data Structure

Teaching Assistant of [Prof. Huiyu Weng](#)

Feb. 2024 - June. 2024

Computer Programming

Teaching Assistant of [Prof. Huiyu Weng](#)

Sept. 2023 - Jan. 2024
